Jacob Junki

.NET Developer

An Aspiring .NET Developer with Junior/Intermediate knowledge of website and application development using the latest technologies and trends. I learn and adapt easily to new environments, while keeping a positive attitude toward co-workers and executives. I can keep to the deadlines and estimate my progress and tasks accurately, making me a reliable asset of a development company.

Jake Yunkee

Full-Stack Developer Specializing in Python and .NET

A versatile Full-Stack Developer with a strong focus on Python and experience in building web applications and automation tools. Skilled in using Python for backend development, data manipulation, and API integration, along with proficiency in .NET Core for scalable applications. Proven track record in delivering complex projects like e-commerce solutions, API development, and web scraping. Quick to adapt to new technologies, collaborative, and consistently meets deadlines, making me a valuable asset in dynamic environments.

WORK EXPERIENCE

Freelance/Consultant

Self-Employed

02/2022 - Present

Working on a variety of projects across multiple tech stacks, primarily focusing on e-commerce and web scraping, Python as the programming language.

Achievements/Tasks

- **Automatic Price Adjuster for Public.gr Partner** : Developed an automatic price adjuster tool that dynamically adjusts product prices based on complex rules and competitor movements. The tool also includes a SKU bulk modifier and an invoice template creator using image manipulation techniques.
- **Custom Shopify Application**: Built a Shopify app that analyzes competitors' landing pages, enhances the content using OpenAI's API, and pushes the enhanced content directly to the client's Shopify store, improving user engagement and sales conversion rates.
- **Telegram Account Management Solution** : Created a solution using Telegram's unofficial API to manage an unlimited number of accounts, allowing for mass direct messaging. The solution bypasses platform restrictions through account rotation and the implementation of residential proxies.
- **TikTok Video Management Tool** : Developed a tool for multiple video uploads and scheduling on TikTok, utilizing session IDs for account management. This tool enables businesses to manage multiple brands and TikTok accounts from a single platform, with the capability to drive organic traffic from various target countries.

.NET Core Developer

Epsilon Net (Singular Logic)

02/2021 - 02/2022

A well-known company developing both customer's projects, as well as maintaining in-house POS (Point of Sale) software.

Achievements/Tasks

- Collaborated with senior developers to design and implement key features for Singular Logic's POS software using .NET Core, improving the system's performance.

.NET Core/AWS Developer

Satori Analytics

02/2020 - 02/2021

Athens, Greece

A solution providing company developing projects for the biggest domestic companies.

Achievements/Tasks
